FAMILY WINE MERCHANTS SINCE 1906

Specification	
Vinification	The grapes are harvested at night, when temperatures are low, in order to keep the grapes fresh and to avoid oxidation. Upon arriving at the cellar, they are carefully pressed. Only the best juices are selected to craft this wine. After a 24h off-settling, the clear juices are drawn and left to ferment for 15 days between 13 and 15°C, in stainless steel tanks. The juices are drawn from the tanks to age on their fine lees for at least 5 months before bottling, protecting the wine from oxidation and enhancing aromas, complexity and texture.
